CD61 (ITGB3) pTyr773 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IHC, WB

Recommended Dilution: Suitable for use in Western blot (1:500~1:1000) and Immunohistochemistry (1:50~1:100).

Reactivity: Human, Mouse

Host: Rabbit
Clonality: Polyclonal

Immunogen: The antiserum was produced against synthesized phosphopeptide derived from human

Integrin β3 around the phosphorylation site of tyrosine 773 (P-L-YP-K-E).

Specificity: The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using

epitope-specific phosphopeptide. The antibody against non-phosphopeptide was removed by chromatography using non-phosphopeptide corresponding to the phosphorylation site. Integrin β 3 (phospho-Tyr773) antibody detects endogenous levels of Integrin β 3 only when

phosphorylated at tyrosine 773.

Formulation: Phosphate buffered saline (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.02% Sodium

Azide and 50% Glycerol. State: Aff - Purified

State: Liquid purified Ig fraction.

Concentration: lot specific

Purification: Immunoaffinity chromatography.

Conjugation: Unconjugated

Storage: Store the antibody (in aliquots) at -20°C.

Avoid repeated freezing and thawing.

Stability: Shelf life: One year from despatch.

Gene Name: integrin subunit beta 3

Database Link: Entrez Gene 3690 Human

P05106

Background:

Human Integrin beta 3 (CD61) antigen is a 90-110 kDa glycoprotein polypeptide which is expressed on platelets, megakaryocytes, macrophages, osteoclasts and synovial lining cells. The platelet glycoprotein is the integrin beta 3 chain of the vitronectin receptor and GPIIb/IIIa complex.

Synonyms:

Integrin beta-3, GP3A, GPIIIa
