G3BP (G3BP1) pSer232 Rabbit Polyclonal Antibody - AP02380PU-SBackground:G3BP is one of the DNA-unwinding enzymes which prefers partially unwound 3'-tailed
substrates and can also unwind partial RNA/DNA and RNA/RNA duplexes in an ATP-
dependent fashion. This enzyme is a member of the heterogeneous nuclear RNA-binding
proteins and is also an element of the Ras signal transduction pathway. It binds specifically to
the Ras-GTPase-activating protein by associating with its SH3 domain. Several alternatively
spliced transcript variants of this gene have been described, but the full-length nature of

some of these variants has not been determined.

Synonyms:

G3BP-1, hDH VIII
