# Product datasheet for AP02386PU-S

# IGF1 Receptor (IGF1R) pTyr1165/1166 Rabbit Polyclonal Antibody

# **Product data:**

| Product Type:           | Primary Antibodies  |
|-------------------------|---|
| Applications:           | IF, WB  |
| Recommended Dilution:   | Western blot: 1/500 - 1/1000.<br>Immunofluorescence: 1/100 - 1/200.   |
| Reactivity:             | Human, Mouse  |
| Host:                   | Rabbit  |
| Clonality:              | Polyclonal  |
| Immunogen:              | Synthetic phosphopeptide derived from human IGF-1R around the phosphorylation site of<br>Tyrosine 1165/1166 (T-D-YP-YP-R-K).                                      |
| Specificity:            | This antibody detects endogenous levels of IGF-1R only when phosphorylated at Tyrosine 1165/1166.   |
| Formulation:            | PBS (without Mg2+ and Ca2+), pH 7.4 containing 150 mM NaCl, 0.02% Sodium Azide and 50%<br>Glycerol<br>State: Aff - Purified<br>State: Liquid purified Ig fraction |
| Concentration:          | lot specific  |
| Purification:           | Immunoaffinity Chromatography   |
| Conjugation:            | Unconjugated  |
| Storage:                | Store the antibody (in aliquots) at -20°C.<br>Avoid repeated freezing and thawing.  |
| Stability:              | Shelf life: One year from despatch.   |
| Predicted Protein Size: | 200, 95 kd  |
| Gene Name:              | insulin like growth factor 1 receptor   |
| Database Link:          | <u>Entrez Gene 3480 Human</u><br><u>P08069</u>  |

#### GF1 Receptor (IGF1R) pTyr1165/1166 Rabbit Polyclonal Antibody – AP02386PU-S

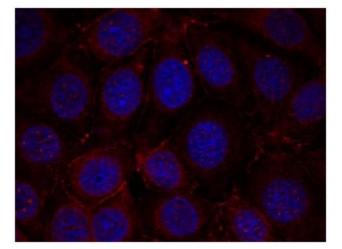

Background:There are two kinds of IGF receptors based on their relative affinities for IGF1 versus IGF2.<br/>The IGF1 receptor prefers IGF1 over IGF2 and weakly binds insulin. IGF1 receptor is a<br/>disulfide-linked heterotetrameric transmembrane protein consisting of two alpha (130 kD)<br/>and two beta (95 kD) subunits. Both the alpha and beta subunits are encoded within a single<br/>receptor precursor cDNA. The IGF1 receptor is therefore similar in structure to the insulin<br/>receptor. The proreceptor polypeptide is proteolytically cleaved and disulfide-linked to yield<br/>the mature heterotetrameric receptor. The IGF1 receptor is highly expressed in all cell types<br/>and tissues and is highly overexpressed in most malignant tissues where it functions as an<br/>anti-apoptotic agent by enhancing cell survival.

Synonyms: IGF-I receptor, IGF1 Receptor
