# Product datasheet for AP02412PU-N

## AKT2 pSer474 Rabbit Polyclonal Antibody

### **Product data:**

Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	Suitable for use in Western blot (1:500~1:1000) and Immunohistochemistry (1:50~1:100).
Reactivity:	Human, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	The antiserum was produced against synthesized phosphopeptide derived from human Akt2 around the phosphorylation site of serine 474 (Q-F-SP-Y-S).
Specificity:	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific phosphopeptide. The antibody against non-phosphopeptide was removed by chromatography using non-phosphopeptide corresponding to the phosphorylation site. Akt2 (phospho-Ser474) antibody detects endogenous levels of Akt2 only when phosphorylated at serine 474.
Formulation:	PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.02% Sodium Azide and 50% Glycerol. State: Aff - Purified State: Liquid purified Ig fraction.
Concentration:	lot specific
Purification:	Immunoaffinity chromatography.
Conjugation:	Unconjugated
Storage:	Store the antibody (in aliquots) at -20°C. Avoid repeated freezing and thawing.
Stability:	Shelf life: One year from despatch.
Gene Name:	AKT serine/threonine kinase 2
Database Link:	<u>Entrez Gene 208 Human</u> <u>P31751</u>

#### Ser 474 Rabbit Polyclonal Antibody – AP02412PU-N

Background:The serine/threonine kinase Akt (protein kinase B or PKB) has a central role in the regulation<br/>of several signaling pathways controlling cell proliferation, apoptosis, angiogenesis, and<br/>diabetes. In humans, there are three genes in the "Akt family": Akt1, Akt2, and Akt3.<br/>AKT2 is a putative oncogene and is a general protein kinase capable of phophorylating<br/>several known proteins. AKT2 is amplified and overexpressed in some human carcinomas.<br/>AKT2 acts primarily as a regulator of glucose metabolism.

Synonyms: RAC-PK-beta, Protein kinase Akt-2, Protein kinase B beta
