Product datasheet for AP02421PU-S

CDK2 pThr160 Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
51	
Applications:	IHC, WB
Recommended Dilution:	Suitable for use in Western blot (1:500~1:1000), ELISA (1:4000) and Immunohistochemistry (1:50~1:100).
Reactivity:	Human, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	The antiserum was produced against synthesized phosphopeptide derived from human CDK2 around the phosphorylation site of threonine 160 (T-Y-TP-H-E).
Specificity:	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific phosphopeptide. The antibody against non-phosphopeptide was removed by chromatography using non-phosphopeptide corresponding to the phosphorylation site. CDK2 (phospho-Thr160) antibody detects endogenous levels of CDK2 only when phosphorylated at threonine 160.
Formulation:	PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.02% Sodium Azide and 50% Glycerol. State: Aff - Purified State: Liquid purified lg fraction.
Concentration:	lot specific
Purification:	Immunoaffinity chromatography.
Conjugation:	Unconjugated
Storage:	Store the antibody (in aliquots) at -20°C. Avoid repeated freezing and thawing.
Stability:	Shelf life: One year from despatch.
Gene Name:	cyclin-dependent kinase 2
Database Link:	<u>Entrez Gene 1017 Human</u> <u>P24941</u>

CDK2 pThr160 Rabbit Polyclonal Antibody – AP02421PU-S

Background:Cdk2 is a member of the Ser/Thr protein kinase family. It is highly similar to the gene
products of S. cerevisiae cdc28, and S. pombe cdc2. It is a catalytic subunit of the cyclin-
dependent protein kinase complex, whose activity is restricted to the G1-S phase, and is
essential for cell cycle G1/S phase transition. This protein associates with and is regulated by
the regulatory subunits of the complex including cyclin A or E, CDK inhibitor p21Cip1
(CDKN1A) and p27Kip1 (CDKN1B). Its activity is also regulated by protein phosphorylation.
Two alternatively spliced variants and multiple transcription initiation sites of this gene have
been reported.

Synonyms:

p33 protein kinase
