MEK4 (MAP2K4) pThr261 Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IF, IHC

Recommended Dilution: Immunofluorescence: 1/100-1/200.

Immunohistochemistry on Paraffin-Embedded Sections: 1/50-1/100.

Reactivity: Human, Mouse, Rat

Host: Rabbit

Clonality: Polyclonal

Immunogen: The antiserum was produced against synthesized phosphopeptide derived from human

SEK1/MKK4 around the phosphorylation site of threonine261 (A-K-Tp-R-D)

Specificity: AP02453PU antibody detects endogenous levels of SEK1/MKK4 only when phosphorylated at

Threonine 261.

Formulation: PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.02% Sodium Azide and 50% Glycerol.

State: Aff - Purified

State: Liquid purified Ig fraction.

Concentration: lot specific

Purification: Affinity-chromatography using epitope-specific phosphopeptide. The antibody against non-

phosphopeptide was removed by chromatography using non-phosphopeptide corresponding

to the phosphorylation site.

Conjugation: Unconjugated

Storage: Store the antibody (in aliquots) at -20°C.

Avoid repeated freezing and thawing.

Stability: Shelf life: One year from despatch.

Gene Name: mitogen-activated protein kinase kinase 4

Database Link: Entrez Gene 6416 Human

P45985

MEK4 (MAP2K4) pThr261 Rabbit Polyclonal Antibody - AP02453PU-N

Background: MEK4 is a dual specificity protein kinase that belongs to the Ser/Thr protein kinase family.

This kinase is a direct activator of MAP kinases in response to various environmental stresses or mitogenic stimuli. It has been shown to activate MAPK8 / JNK1, MAPK9 / JNK2, and MAPK14

/ p38, but not MAPK1 / ERK2 or MAPK3 / ERK3. This kinase is phosphorylated, and thus activated by MAP3K1 / MEKK. The knockout studies in mice suggested the roles of this kinase in mediating survival signal in T cell development, as well as in the organogenesis of liver.

Synonyms: JNK-activating kinase 1, MAP Kinase Kinase 4, SAPK/ERK kinase 1, PRKMK4, SERK1, MEK-4,

MAPKK4, MKK4
