### Ser33 Rabbit Polyclonal Antibody – AP02477PU-S beta Catenin (CTNNB1) pSer33 Rabbit Polyclonal Antibody – AP02477PU-S

Background:Key dowstream component of the canonical Wnt signaling pathway. In the absence of Wnt,<br/>forms a complex with AXIN1, AXIN2, APC, CSNK1A1 and GSK3B that promotes<br/>phosphorylation on N-terminal Ser and Thr residues and ubiquitination of CTNNB1 via BTRC<br/>and its subsequent degradation by the proteasome. In the presence of Wnt ligand, CTNNB1 is<br/>not ubiquitinated and accumulates in the nucleus, where it acts as a coactivator for<br/>transcription factors of the TCF/LEF family, leading to activate Wnt responsive genes.<br/>Involved in the regulation of cell adhesion. The majority of beta-catenin is localized to the cell<br/>membrane and is part of E-cadherin/catenin adhesion complexes which are proposed to<br/>couple cadherins to the actin cytoskeleton.

#### Synonyms: CTNNB1, CTNNB, Beta-catenin
