### Product datasneet for AP02559PU-3

# MEF2A pSer408 Rabbit Polyclonal Antibody

**Product data:** 

**Product Type:** Primary Antibodies

Applications: IHC

**Recommended Dilution:** Immunohistochemistry: 1:50~1:100.

**Reactivity:** Human, Mouse

**Host:** Rabbit

Clonality: Polyclonal

**Immunogen:** The antiserum was produced against synthesized phosphopeptide derived from human

MEF2A around the phosphorylation site of serine 408 (P-I-SP-P-P).

**Specificity:** MEF2A antibody detects endogenous levels of MEF2A only when phosphorylated at serine

408.

Formulation: PBS(without Mg2+ and Ca2+), pH 7.4 containing 150mM NaCl, 0.02% sodium azide and 50%

glycerol

State: Aff - Purified State: Liquid purified IgG

**Concentration:** lot specific

**Purification:** The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using

epitope-specific phosphopeptide. The antibody against non-phosphopeptide was removed by

chromatography using non-phosphopeptide corresponding to the phosphorylation site.

Conjugation: Unconjugated

Storage: Store the antibody at -20°C.

Avoid repeated freezing and thawing.

**Stability:** Shelf life: one year from despatch.

**Gene Name:** myocyte enhancer factor 2A

**Database Link:** Entrez Gene 4205 Human

#### MEF2A pSer408 Rabbit Polyclonal Antibody - AP02539PU-S

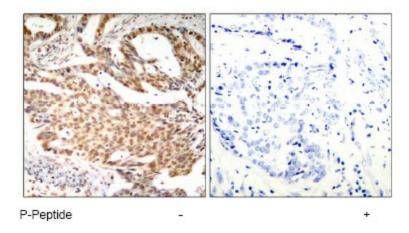

**Background:** MEF2A (myocyte specific enhancer factor 2) belongs to a family of DNA binding regulatory

proteins. The MEF2 family of transcription factors is highly expressed in the brain when neurons undergo dendritic maturation and synapse formation. MEF2A is especially abundant in granule neurons of the cerebellar cortex throughout the period of synaptogenesis. MEF2A

also has key roles in cardiac and skeletal muscle development.

Synonyms: MEF2, Myocyte-specific enhancer factor 2A
