

Product datasheet for AP02563PU-N

c-Jun (JUN) non phospho Thr91 Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	IF, IHC, WB
Recommended Dilution:	Western Blot: 1/500 - 1/1000; Incubate membrane with diluted antibody in 5% nonfat milk, 1X TBS, 0,1% Tween-20 at 4°C with gentle shaking, overnight. Immunohistochemistry on paraffin sections: 1/50 - 1/100. Immunofluorescence: 1/100 - 1/200.
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Peptide sequence around amino acids 89~93 (T-T-TP-P-T) derived from Human c-Jun.
Specificity:	c-Jun antibody detects endogenous levels of total c-Jun protein.
Formulation:	PBS(without Mg2+ and Ca2+), pH 7.4 containing 150mM NaCl, 0.02% sodium azide and 50% glycerol State: Aff - Purified State: Liquid purified IgG fraction
Concentration:	lot specific
Purification:	Affinity chromatography
Conjugation:	Unconjugated
Storage:	Store the antibody at -20°C. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	Jun proto-oncogene, AP-1 transcription factor subunit
Database Link:	<u>Entrez Gene 3725 Human</u> <u>P05412</u>

CRIGENE c-Jun (JUN) non phospho Thr91 Rabbit Polyclonal Antibody – AP02563PU-N

Background:The human protooncogene JUN is the putative transforming gene of avian sarcoma virus 17,
and it encodes a protein which is highly homologous to the viral protein. cJun (previously
known as the Fos binding protein p39) and c Fos form a complex in the nucleus. AP 1
(activating protein 1) is a collective term referring to these dimeric transcription factors
composed of Jun, Fos or ATF subunits that bind to a common DNA site, the AP1 binding site.
AP 1 proteins, mostly the Jun group, regulate the expression and function of cell cycle
regulators such as Cyclin D1, p53, p21 (cip1/waf1), p19 (ARF) and p16. Fos and Jun proto
oncogene expression is induced transiently by a variety of extracellular stimuli associated
with mitogenesis, differentiation processes or depolarization of neurons. JUN has been
mapped to 1p32 to p31, a chromosomal region involved in both translocations and deletions
in human malignancies.

Synonyms: Transcription factor AP1
