

Product datasheet for AP02608PU-S

Estrogen Receptor 1 (ESR1) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies Applications: IF, IHC, WB Recommended Dilution: Western Blot: 1/500 - 1/1000. Immunohistochemistry on paraffin sections: 1/50 - 1/100. Immunofluorescence: 1/100 - 1/200. **Reactivity:** Human, Mouse Host: Rabbit **Clonality:** Polyclonal Immunogen: Synthetic non-phosphopeptide derived from human Estrogen Receptor-alpha around the phosphorylation site of serine118 (Q-L-SP-P-F). Specificity: Estrogen Receptor-alpha antibody detects endogenous levels of total Estrogen Receptoralpha protein. Formulation: PBS(without Mg2+ and Ca2+), pH 7.4 containing 150mM NaCl, 0.02% sodium azide and 50% glycerol State: Aff - Purified State: Liquid purified IgG fraction **Concentration:** lot specific **Purification:** Affinity chromatography **Conjugation:** Unconjugated Storage: Store the antibody at -20°C. Avoid repeated freezing and thawing. Stability: Shelf life: one year from despatch. Gene Name: estrogen receptor 1 Database Link: Entrez Gene 2099 Human P03372

Strogen Receptor 1 (ESR1) Rabbit Polyclonal Antibody – AP02608PU-S

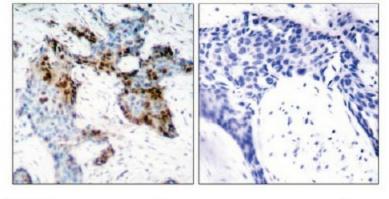

Background:Estrogen Receptor alpha is a 65 kDa protein and a member of the steroid family of nuclear
receptors. Estrogen Receptor alpha is a ligand-activated transcription factor that, when
bound to estrogen, induces a conformational change that allows dimerization and binding to
estrogen response element sequences. When bound to DNA, Estrogen Receptor alpha can
positively or negatively regulate gene transcription.
Like other steroid hormone receptors, Estrogen Receptors are intracellular proteins. Estrogen
Receptors play an important role in regulating mammary gland growth and differentiation.
Breast tumors that are ER positive may also show a more favorable response to anti-estrogen
therapies.

Synonyms: ER alpha, Estradiol receptor, ESR1, ESR, NR3A1
