| Product Type:         | Primary Antibodies  |
|-----------------------|---|
| Applications:         | IF, IHC, WB   |
| Recommended Dilution: | Western blot: 1/500-1/1000.<br>Immunofluorescence: 1/100-1/200.<br>Immunohistochemistry on Paraffin-Embedded Sections: 1/50-1/100.                              |
| Reactivity:           | Human, Mouse, Rat   |
| Host:                 | Rabbit  |
| Clonality:            | Polyclonal  |
| Immunogen:            | The antiserum was produced against synthesized non-phosphopeptide derived from human IRS-1 around the phosphorylation site of serine 636 (P-M-S <i>P</i> -P-K). |
| Specificity:          | This antibody AP02732PU detects endogenous levels of total IRS-1 protein.   |
| Formulation:          | PBS (without Mg2+ and Ca2+), pH 7.4, 150 mM NaCl, 0.02% Sodium Azide and 50% Glycerol.<br>State: Aff - Purified<br>State: Liquid purified Ig fraction.          |
| Concentration:        | lot specific  |
| Purification:         | Immunoaffinity Chromatography using epitope-specific immunogen.   |
| Conjugation:          | Unconjugated  |
| Storage:              | Store the antibody (in aliquots) at -20°C.<br>Avoid repeated freezing and thawing.  |
| Stability:            | Shelf life: One year from despatch.   |
| Gene Name:            | insulin receptor substrate 1  |
| Database Link:        | <u>Entrez Gene 3667 Human</u><br><u>P35568</u>  |

### **GRIGENE** IRS1 Rabbit Polyclonal Antibody – AP02732PU-N

Background: Insulin receptor substrates (IRS) are responsible for several insulin related activities, such as glucose homeostasis, cell growth, cell transformation, apoptosis and insulin signal transduction. Serine/threonine phosphorylation of IRS1 has been demonstrated to be a negative regulator of insulin signaling and is responsible for its degradation, although IRS1 degradation pathways are not well understood. IRS1 has also been shown to be constitutively activated in cancers such as breast cancer, Wilm's tumors, and adrenal cortical carcinomas, thus making IRS1 phosphorylation and subsequent degradation an attractive therapeutic target. To date there have been four subtypes identified: IRS1, 2, 3 and 4, with IRS1 being widely expressed.

#### Synonyms:

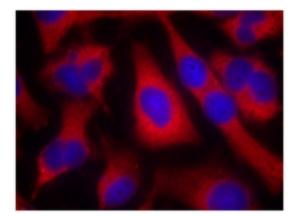

Insulin receptor substrate 1, IRS-1

## **Product images:**

Immunohistochemical analysis of paraffinembedded human breast carcinoma tissue, using IRS-1 antibody.

Peptide

Immunofluorescence staining of methanol-fixed HeLa cells using IRS-1 antibody (Red).
