OriGene Technologies, Inc.

MARCKS Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: WE

Recommended Dilution: Western Blot: 1:500~1:1000.

Reactivity: Human, Mouse

Host: Rabbit

Clonality: Polyclonal

Immunogen: The antiserum was produced against synthesized non-phosphopeptide derived from human

MARCKS around the phosphorylation site of aa 160~164 (K-K-S-F-K).

Specificity: MARCKS antibody detects endogenous levels of total MARCKS protein.

Formulation: PBS (without Mg2+ and Ca2+), pH 7.4 containing 150mM NaCl, 0.02% sodium azide and 50%

glycerol.

State: Aff - Purified

State: Liquid purified IgG

Concentration: lot specific

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using

epitope-specific immunogen.

Conjugation: Unconjugated

Storage: Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.

Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

Gene Name: myristoylated alanine rich protein kinase C substrate

Database Link: Entrez Gene 4082 Human

P29966

Background: MARCKS, (Myristoylated Alanine-Rich C Kinase Substrate), is a member of a family of

calmodulin binding proteins and is a major substrate for phosphorylation by protein kinase C

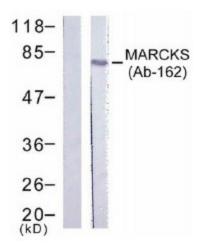

(PKC). The phosphorylation of Ser152/156 can be used as a measure of PKC activation. Phosphorylation of Ser152/156 modulates the binding of MARCKS to calmodulin.

Synonyms: Myristoylated alanine-rich C-kinase substrate, MACS, PRKCSL
