Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	Western Blot: 1/500~1/1000. Immunohistochemistry on Paraffin Sections: 1/50~1/100.
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	The antiserum was produced against synthesized non-phosphopeptide derived from human IGF-1R around the phosphorylation site of Tyrosine 1280 (S-F-Y <i>p</i> -Y-S).
Specificity:	This antibody detects endogenous levels of total IGF-1R protein.
Formulation:	PBS (without Mg2+ and Ca2+), pH 7.4 containing 150mM NaCl, 0.02% Sodium Azide and 50% Glycerol. State: Aff - Purified State: Liquid purified IgG fraction.
Concentration:	lot specific
Purification:	Affinity Chromatography using epitope-specific immunogen.
Conjugation:	Unconjugated
Storage:	Store the antibody (in aliquots) at -20°C. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	insulin like growth factor 1 receptor
Database Link:	<u>Entrez Gene 3480 Human</u> <u>P08069</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### **GRIGENE** IGF1 Receptor (IGF1R) Rabbit Polyclonal Antibody – AP02787PU-N

Background:There are two kinds of IGF receptors based on their relative affinities for IGF1 versus IGF2.<br/>The IGF1 receptor prefers IGF1 over IGF2 and weakly binds insulin. IGF1 receptor is a<br/>disulfide-linked heterotetrameric transmembrane protein consisting of two alpha (130 kD)<br/>and two beta (95 kD) subunits. Both the alpha and beta subunits are encoded within a single<br/>receptor precursor cDNA. The IGF1 receptor is therefore similar in structure to the insulin<br/>receptor. The proreceptor polypeptide is proteolytically cleaved and disulfide-linked to yield<br/>the mature heterotetrameric receptor. The IGF1 receptor is highly expressed in all cell types<br/>and tissues and is highly overexpressed in most malignant tissues where it functions as an<br/>anti-apoptotic agent by enhancing cell survival.

#### Synonyms: IGF-I receptor, IGF1 Receptor
