

Product datasheet for AP05019PU-N

MAGI3 (PDZ 4-5) Sheep Polyclonal Antibody

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	Western Blot: 1 - 10 $\mu\text{g}/\text{ml}.$ Detects a 130 kDa band in cells transfected with full-length MAGI-3 protein.
Reactivity:	Human
Host:	Sheep
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Recombinant protein corresponding to PDZ domain 4-5 of MAGI-3.
Specificity:	This antibody reacts to M A G I - 3 , P D Z 4 - 5 .
Formulation:	Phosphate buffered saline with 0.08% sodium azide State: Purified State: Liquid purified lg (0.2 μm sterile filtered)
Concentration:	lot specific
Conjugation:	Unconjugated
Storage:	The antibody can be shipped at ambient temperature. Store (in aliquots) at -20°C only. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	membrane associated guanylate kinase, WW and PDZ domain containing 3
Database Link:	<u>Entrez Gene 260425 Human</u> <u>Q5TCQ9</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	MAGI3 (PDZ 4-5) Sheep Polyclonal Antibody – AP05019PU-N
Background:	Membrane-associated guanylate kinase with inverted orientation (MAGI3) is a novel, 130 kDa guanylate kinase which is part of a family of multi-PDZ domain containing guanylate kinases. These guanylate kinases are localized to epithelial cell tight junctions. MAGI3 and PTEN/MMAC cooperate to modulate the kinase activity of AKT/protein kinase B (PKB). MAGI3 positions the PTEN/MMAC phosphatase to specific subcellular locations that are involved with the regulation of cell proliferation and survival. MAGI3, as well as other proteins in this family, are made up of an N-terminal guanylate kinase domain, followed by a WW domain, named for two conserved tryptophan residues and first identified as two repeats in mouse YAP65, which is then followed by 6 PDZ domains.
Synonyms:	MAGI-3
Protein Families	: Druggable Genome

Protein Pathways: Tight junction

Product images:

Western blot analysis using MAGI-3, PDZ 4-5 antibody on cell lysates transfected with fulllength human MAGI-3 protein.
