

Product datasheet for AP06111PU-N

Estrogen Receptor 1 (ESR1) Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	Western blot: 1/500-1/1000. Immunohistochemistry on Paraffin Sections: 1/50-1/200.
Reactivity:	Human, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Synthetic peptide, corresponding to amino acids 131-180 of Human ER α .
Specificity:	This antibody detects endogenous levels of Estrogen receptor alpha (region surrounding Gly161).
Formulation:	Phosphate buffered saline (PBS), pH 7.2 State: Aff - Purified State: Liquid purified Ig fraction (> 95% pure by SDS-PAGE) Preservative: 0.05% Sodium azide
Concentration:	1.0 mg/ml
Purification:	Affinity Chromatography using epitope-specific immunogen
Conjugation:	Unconjugated
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	~66 kDa
Gene Name:	estrogen receptor 1
Database Link:	<u>Entrez Gene 2099 Human</u> <u>P03372</u>

Strogen Receptor 1 (ESR1) Rabbit Polyclonal Antibody – AP06111PU-N

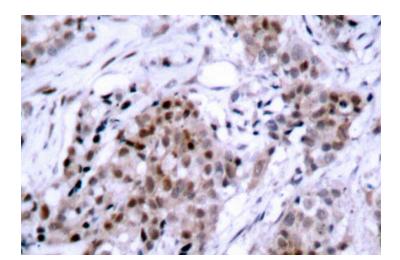

Background:Estrogen receptors (ER) are members of the steroid/thyroid hormone receptor superfamily of
ligand-activated transcription factors. Estrogen receptors, including ERα and ERβ, contain
DNA binding and ligand binding domains and are critically involved in regulating the normal
function of reproductive tissues. ERα and ERβ have been shown to be differentially activated
by various ligands. Receptor-ligand interactions trigger a cascade of events, including
dissociation from heat shock proteins, receptor dimerization, phosphorylation and the
association of the hormone activated receptor with specific regulatory elements in target
genes. Evidence suggests that ERα and ERβ may be regulated by distinct mechanisms even
though they share many functional characteristics.

Synonyms: ER alpha, Estradiol receptor, ESR1, ESR, NR3A1
