Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	Western blot: 1/500-1/1000. Immunohistochemistry on paraffin sections: 1/50-1/200.
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Synthetic peptide surrounding Asp131 of Human CGB.
Specificity:	This antibody detects endogenous levels of hCG β protein. (region surrounding Asp131)
Formulation:	Phosphate buffered saline (PBS), 50% glycerol, pH 7.2. State: Aff - Purified State: Liquid purified lg fraction Preservative: 0.05% sodium azide
Concentration:	1.0 mg/ml
Purification:	Affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS- PAGE)
Conjugation:	Unconjugated
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	~ 18 kDa
Gene Name:	chorionic gonadotropin beta subunit 3
Database Link:	<u>Entrez Gene 1082 Human</u> <u>P0DN86</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

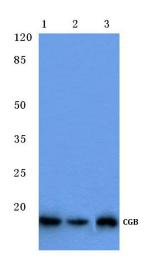

#### CRIGENE hCG beta (CGB3) Rabbit Polyclonal Antibody – AP06154PU-M

Background:Choriogonadotropin is a hormone produced by the placenta in the first trimester of<br/>pregnancy and exists as a heterodimer formed from a unique β chain and an α chain<br/>common to all gonadotropins. The unique β chain confers biological specificity to<br/>choriogonadotropin, luteinizing hormone and follicle stimulating hormone. The secreted α<br/>subunit maps to human chromosome 6 and the β subunit of choriogonadotropin maps to<br/>human chromosome 19. Choriogonadotropin stimulates the ovaries to produce and maintain<br/>normal levels of the steroids essential for maintaining pregnancy, including estrogen and<br/>progesterone. Choriogonadotropin is a member of the cystine knot growth-factor<br/>superfamily, a group of proteins that contain a distinct arrangement of six cysteine residues<br/>and are expressed in placenta. The proper secretion and dimerization of choriogonadotropin<br/>depends on the conformation of the cystine knot, although biological activity is independent<br/>of this conformation.

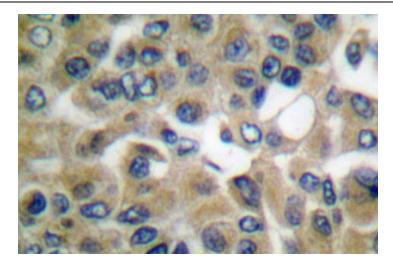

Synonyms:

Choriogonadotropin subunit beta, CGB, CGB3, beta hCG, hCG-beta
