

Product datasheet for AP06288PU-N

Troduct dutusfiect for Al 002001 0 14

PML Protein (PML) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IF, IHC, WB

Recommended Dilution: Western blot: 1/500-1/1000.

Immunohistochemistry on paraffin sections: 1/50-1/200.

Immunofluorescence: 1/50-1/200.

Reactivity: Human
Host: Rabbit

Clonality: Polyclonal

Immunogen: Synthetic peptide, corresponding to the N-terminal of Human PML.

Specificity: This antibody detects endogenous levels of PML protein.

(region surrounding Pro39)

Formulation: Phosphate buffered saline (PBS), pH~7.2

State: Aff - Purified

State: Liquid purified Ig fraction (> 95% pure by SDS-PAGE).

Preservative: 0.05% Sodium Azide

Concentration: 1.0 mg/ml

Purification: Affinity-chromatography using epitope-specific immunogen.

Conjugation: Unconjugated

Storage: Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.

Avoid repeated freezing and thawing.

Stability: Shelf life: One year from despatch.

Predicted Protein Size: ~ 98 kDa

Gene Name: promyelocytic leukemia

Database Link: Entrez Gene 5371 Human

P29590

Background:

The PML protein is a zinc finger transcription factor expressed as three major transcription products due to alternative splicing. The gene encoding human PML maps to chromosome 15q22. The t(15;17) (q22;q11.2-q12) chromosomal trans-location of the retinoic acid receptor alpha (RARalpha) gene occurs in virtually all cases of acute promyelocytic leukemia and results in the expression of a PML/RARalpha chimeric protein. Myeloid precursor cells expressing the PML/ RARalpha chimera fail to differentiate and exhibit an increased growth rate consequent to diminished apoptosis. PML/RARalpha transforms myeloid precursors by recruiting the nuclear co-repressor (N-CoR)-histone deacetylase complex that is essential to retinoic acid-dependent myeloid differentiation. PML/ RARalpha also recruits DNA methyltransferases in order to induce gene hypermethylation and silencing, which ultimately facilitates leukemogenesis.

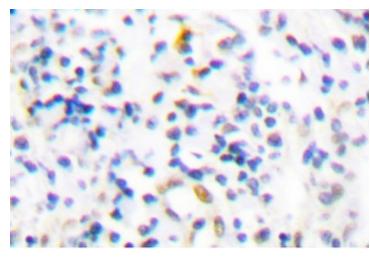

Synonyms:

RING finger protein 71, MYL, TRIM19
