OriGene Technologies, Inc.

TGF alpha (TGFA) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IHC, WB

Recommended Dilution: Western blot: 1/500-1/1000.

Immunohistochemistry on paraffin sections: 1/50-1/200.

Reactivity: Human, Mouse, Rat

Host: Rabbit

Clonality: Polyclonal

Immunogen: Synthetic peptide, corresponding to amino acids 111-160 of Human TGFα.

Specificity: This antibody detects endogenous levels of TGF alpha protein.

(region surrounding Arg139)

Formulation: Phosphate buffered saline (PBS), pH 7.2.

State: Aff - Purified

State: Liquid purified lg fraction Preservative: 0.05% sodium azide

Concentration: 1.0 mg/ml

Purification: Affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-

PAGE)

Conjugation: Unconjugated

Storage: Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.

Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

Predicted Protein Size: ~ 10, 17 kDa

Gene Name: transforming growth factor alpha

Database Link: Entrez Gene 7039 Human

P01135

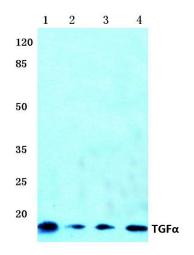

Background:

Transforming growth factor alpha (TGFalpha) is an acid- and heat-stable 50 amino acid protein originally found in rodents and humans. TGFalpha is 33% homologous at the amino acid level to epidermal growth factor (EGF). TGFalpha binds to the EGF receptor, mediates tyrosine phosphorylation of the receptor and promotes anchorage-independent growth of normal rat fibroblasts in soft agar in the presence of transforming growth factor beta. TGFalpha is secreted by a variety of transformed cells and tumors, embryonic cells and some normal adult cells. TGFalpha bioactivity has been found in the urine of cancer patients. It has been suggested that it may act as an autocrine growth factor for the induction or maintenance of malignancy.

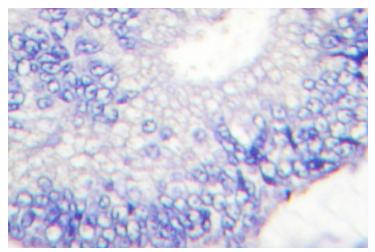

Synonyms:

Transforming growth factor alpha, ETGF
