

Product datasheet for AP06399PU-M

LYN Rabbit Polyclonal Antibody

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Primary Antibodies
Applications:	ELISA, IHC, WB
Recommended Dilution:	Western blot: 1/500-1/1000. Immunohistochemistry on paraffin sections: 1/50-1/200.
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Synthetic peptide, corresponding to amino acids 461-510 of Human Lyn.
Specificity:	This antibody detects endogenous levels of Lyn protein. (region surrounding Thr501)
Formulation:	Phosphate buffered saline (PBS), pH 7.2. State: Aff - Purified State: Liquid purified lg fraction Preservative: 15 mM sodium azide
Concentration:	1.0 mg/ml
Purification:	Affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS- PAGE)
Conjugation:	Unconjugated
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	~ 50,58 kDa
Gene Name:	LYN proto-oncogene, Src family tyrosine kinase
Database Link:	<u>Entrez Gene 4067 Human</u> <u>P07948</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

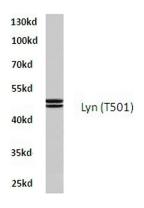

GRIGENE LYN Rabbit Polyclonal Antibody – AP06399PU-M

Background:Src is the human homolog of the v-Src gene of the Rous sarcoma virus, also known as avian
sarcoma virus or ASV. Src is the first proto-oncogenic non-receptor tyrosine kinase
characterized in human. By virtue of common structural motifs, the Src family is composed of
nine members in vertebrates, including Src, Yes, Fgr, Frk, Fyn, Lyn, Hck, Lck and Blk. Src-family
kinases transduce signals that are involved in the control of a variety of cellular processes,
including proliferation, differentiation, motility and adhesion. Src-family kinases contain an
amino-terminal cell membrane anchor followed by an SH3 domain and an SH2 domain
involved in modular association and activation, respectively. Src-family kinases are normally
maintained in an inactive state and can be activated transiently during cellular events such as
mitosis. The human Lyn gene maps to chromosome 8q13 and encodes a 505 amino acid
protein. Hematopoietic tissues predominantly express Lyn, which influences normal
immunoglobulin production and regulation.

Synonyms:

Tyrosine-protein kinase Lyn
