

Product datasheet for AP06406PU-S

PLCG 2 (PLCG2) Rabbit Polyclonal Antibody

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Primary Antibodies
Applications:	ELISA, IHC, WB
Recommended Dilution:	Western blot: 1/500-1/1000. Immunohistochemistry on paraffin sections: 1/50-1/200.
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Synthetic peptide, corresponding to amino acids 720-770 of Human PLC γ 2.
Specificity:	This antibody detects endogenous levels of PLCG2 protein. (region surrounding Arg747)
Formulation:	Phosphate buffered saline (PBS), pH~7.2 State: Aff - Purified State: Liquid purified Ig fraction (> 95% pure by SDS-PAGE) Preservative: 0.05% Sodium Azide
Concentration:	1.0 mg/ml
Purification:	Affinity Chromatography using epitope-specific immunogen
Conjugation:	Unconjugated
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: One year from despatch.
Predicted Protein Size:	~ 148 kDa
Gene Name:	phospholipase C gamma 2
Database Link:	<u>Entrez Gene 5336 Human</u> <u>P16885</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

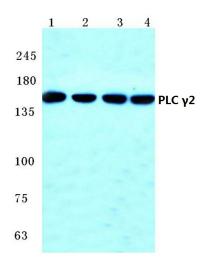

Source PLCG 2 (PLCG2) Rabbit Polyclonal Antibody – AP06406PU-S

Background:Phosphoinositide-specific phospholipase C (PLC) plays a crucial role in the initiation of
receptor mediated signal transduction through the generation of the two second messengers,
inositol 1,4,5-triphosphate and diacylglycerol from phosphatidylinositol 4,5-bisphosphate.
There are many mammalian PLC isozymes, including PLC β1, PLC β2, PLC β3, PLC β4, PLCγ1,
PLCγ2, PLC δ1, PLC δ2 and PLCe. PLCδ exists as four different isoforms. PLC δ1, a calcium
signal amplifier, is activated by an atypical GTP-binding protein. In addition, PLC δ1 is an
effector for GTP-binding protein transglutaminase II-mediated oxytocin receptor and α1B-
adrenoreceptor signaling. Mouse PLC δ1 is highly expressed in brain, heart, lung and testis.
PLC δ is abnormally accumulated in autopsied brains with Alzheimer's disease (AD),
suggesting that it may play a role in the pathology of AD. PLC δ2 is expressed in type I
intestinal metaplasia, the metaplasia is generally considered benignant, yet evolves toward
neoplastic transformation. Thus, PLC δ2 expression may be a possible marker of gastric
malignant transformation.

Phospholipase C-gamma-2, PLC-gamma-2, Phospholipase C-IV, PLC-IV
