| Product Type:           | Primary Antibodies  |
|-------------------------|---|
| Applications:           | IF, IHC, WB   |
| Recommended Dilution:   | Western blot: 1/500-1/1000.<br>Immunohistochemistry on paraffin sections: 1/50-1/200.<br>Immunofluorescence: 1/50-1/200.                    |
| Reactivity:             | Human, Mouse, Rat   |
| Host:                   | Rabbit  |
| Clonality:              | Polyclonal  |
| Immunogen:              | Synthetic peptide, corresponding to amino acids 426-476 of Human Smad2.   |
| Specificity:            | This antibody detects endogenous levels of Smad2 protein.<br>(region surrounding Pro459)  |
| Formulation:            | Phosphate buffered saline (PBS), pH 7.2.<br>State: Aff - Purified<br>State: Liquid purified Ig fraction<br>Preservative: 0.05% sodium azide |
| Concentration:          | 1.0 mg/ml   |
| Purification:           | Affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-<br>PAGE)  |
| Conjugation:            | Unconjugated  |
| Storage:                | Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.<br>Avoid repeated freezing and thawing.                        |
| Stability:              | Shelf life: one year from despatch.   |
| Predicted Protein Size: | ~ 60 kDa  |
| Gene Name:              | SMAD family member 2  |
| Database Link:          | <u>Entrez Gene 4087 Human</u><br><u>Q15796</u>  |

## SMAD2 Rabbit Polyclonal Antibody – AP06413PU-S

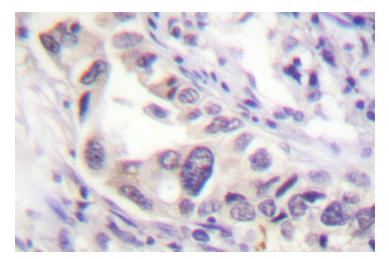

| Background: | Smad proteins, the mammalian homologs of the Drosophila mothers against                              |
|-------------|--|
|             | decapentaplegic (Mad), have been implicated as downstream effectors of GF $eta$ /BMP signaling.      |
|             | Smad1 (also designated Madr1 or JV4-1) and Smad5 are effectors of BMP-2 and BMP-4                    |
|             | function, while Smad2 (also designated Madr2 or JV18-1) and Smad3 are involved in TGF $eta$ and      |
|             | activin-mediated growth modulation. Smad4 (also designated DPC4) has been shown to                   |
|             | mediate all of the above activities through interaction with various Smad family members.            |
|             | Smad6 and Smad7 regulate the response to activin/TGF $eta$ signaling by interfering with TGF $eta$ - |
|             | mediated phosphorylation of other Smad proteins.   |
|             |  |

Synonyms: SMAD family member 2, SMAD-2, SMAD 2, MADH2, MAD homolog 2, MADR2, Mad-related protein 2, JV18-1

### **Product images:**

Western blot (WB) analysis of Smad2 antibody in extracts from HepG2 or K562 cells trested with UV 5'.

Immunohistochemistry (IHC) analyzes of Smad2 antibody in paraffin-embedded human prostate carcinoma lung carcinoma tissue.
