

Product datasheet for AP06420PU-M

Tyrosine Hydroxylase (TH) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies IHC, WB **Applications:** Recommended Dilution: Western blot: 1/500-1/1000. Immunohistochemistry on paraffin sections: 1/50-1/200. **Reactivity:** Human, Mouse, Rat Host: Rabbit **Clonality:** Polyclonal Synthetic peptide, corresponding to the N-terminus of Human TH. Immunogen: This antibody detects endogenous levels of Tyrosine Hydroxylase protein. Specificity: (region surrounding Gln25) Formulation: Phosphate buffered saline (PBS), pH 7.2. State: Aff - Purified State: Liquid purified lg fraction Preservative: 0.05% sodium azide **Concentration:** 1.0 mg/ml **Purification:** Affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE) **Conjugation:** Unconjugated Storage: Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing. Stability: Shelf life: one year from despatch. Predicted Protein Size: ~ 58 kDa Gene Name: tyrosine hydroxylase Database Link: Entrez Gene 7054 Human P07101

GRIGENE Tyrosine Hydroxylase (TH) Rabbit Polyclonal Antibody – AP06420PU-M

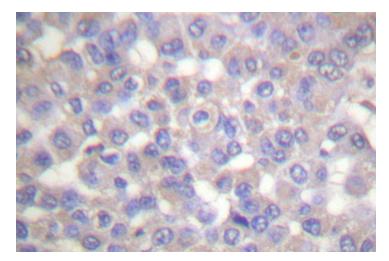

Background:The enzyme tyrosine hydroxylase (TH), also designated tyrosine 3-monooxygenase (TY3H),
catalyzes the conversion of tyrosine to L-dopa, which is the rate limiting step in the
biosynthesis of catecholamines such as dopamine, adrenalin and noradrenalin. TH is thought
to play a role in the pathogenesis of Parkinson's disease, which is associated with reduced
dopamine levels. Two transcription factor binding sites in the proximal region of the TH gene,
the TPA-responsive element (TRE) and the c-AMP responsive element (CRE), have been
implicated in the complex regulation of the TH gene. TH is also known to be upregulated by
the glia maturation factor (GMF), a Cdc 10/SWI6 motif-containing protein called V-1, and a
variety of additional compounds.

Synonyms: Tyrosine 3-hydroxylase, TYH
