| Product Type:           | Primary Antibodies  |
|-------------------------|---|
| Applications:           | IF, IHC, WB   |
| Recommended Dilution:   | Western blot: 1/500-1/1000.<br>Immunohistochemistry on paraffin sections: 1/50-1/200.<br>Immunofluorescence: 1/50-1/200.                    |
| Reactivity:             | Human, Mouse, Rat   |
| Host:                   | Rabbit  |
| Clonality:              | Polyclonal  |
| Immunogen:              | Synthetic peptide, corresponding to amino acids 401-450 of Human Cytokeratin 8.   |
| Specificity:            | This antibody detects endogenous levels of K8 protein.<br>(region surrounding Gly427)   |
| Formulation:            | Phosphate buffered saline (PBS), pH 7.2.<br>State: Aff - Purified<br>State: Liquid purified Ig fraction<br>Preservative: 15 mM sodium azide |
| Concentration:          | 1.0 mg/ml   |
| Purification:           | Affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-<br>PAGE)  |
| Conjugation:            | Unconjugated  |
| Storage:                | Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.<br>Avoid repeated freezing and thawing.                        |
| Stability:              | Shelf life: one year from despatch.   |
| Predicted Protein Size: | ~ 55 kDa  |
| Gene Name:              | keratin 8   |
| Database Link:          | <u>Entrez Gene 3856 Human</u><br><u>P05787</u>  |

|             | Cytokeratin 8 (KRT8) Rabbit Polyclonal Antibody – AP06531PU-M   |
|-------------|---|
| Background: | Cytokeratins comprise a diverse group of intermediate filament proteins (IFPs) that are<br>expressed as pairs in both keratinized and non-keratinized epithelial tissue. Cytokeratins play<br>a critical role in differentiation and tissue specialization and function to maintain the overall<br>structural integrity of epithelial cells. Cytokeratins have been found to be useful markers of<br>tissue differentiation which is directly applicable to the characterization of malignant tumors.<br>Cytokeratin 5 is expressed in normal basal cells. Mutations of the Cytokeratin 5 gene (KRT5)<br>have been shown to result in the autosomal dominant disorder epidermolysis bullosa (EB). |

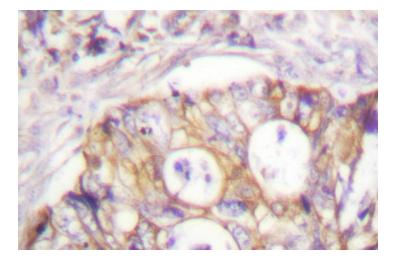

#### Synonyms: KRT8, CYK8, Cytokeratin-8, CK8, Keratin-8, K8, Cytokeratin endo A
