OriGene Technologies, Inc.

MST1 (+MST2) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

Applications: IHC, WB

Recommended Dilution: Western blot: 1/500-1/2000.

Immunohistochemistry on paraffin sections: 1/50-1/200.

Reactivity: Human, Mouse

Host: Rabbit

Clonality: Polyclonal

Immunogen: Synthetic peptide, corresponding to amino acids 150-200 of Human MST1.

Specificity: This antibody detects endogenous levels of MST1/2 protein.

(region surrounding Meth178)

Formulation: Phosphate buffered saline (PBS), pH 7.2.

State: Aff - Purified

State: Liquid purified lg fraction Preservative: 0.05% sodium azide

Concentration: 1.0 mg/ml

Purification: Affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-

PAGE)

Conjugation: Unconjugated

Storage: Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.

Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

Predicted Protein Size: ~ 65 kDa

Gene Name: macrophage stimulating 1

Database Link: Entrez Gene 15235 MouseEntrez Gene 4485 Human

P26927

Background:

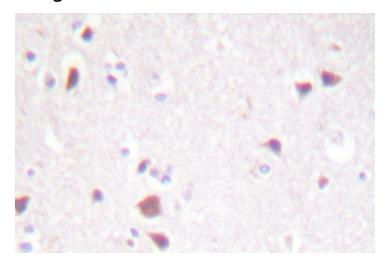

Sterile-20 (STE20) is a serine/threonine kinase in Saccharomyces cerevisiae that is involved in relaying signals from G protein coupled receptors to cytosolic MAP kinase cascades. Mammalian protein kinases that display sequence similarity to STE20 are divided into two groups, the PAK subfamily and the GCK subfamily. The PAK subfamily members contain a C-terminal catalytic domain and an N-terminal regulatory domain with a p21Rac/Cdc42-binding site, and these kinases can activate both p38MAPK and JNK. The GCK subfamily members contain a C-terminal regulatory domain and an Nterminal catalytic domain, and they have diverse roles in many pathways, including the activation of ERK< JNK, p38 MAPK, and caspase-3. The mammalian STE20-like kinases (MST kinases, also known as Ksr proteins) are members of the GCK subfamily.

Synonyms: MST1, D3F15S2, DNF15S2, HGFL, Macrophage-stimulating protein, Hepatocyte growth factor-

like protein, MSP

Protein Families: Druggable Genome
