Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	Western blot: 1/500-1/1000. Immunohistochemistry on Paraffin Sections: 1/50-1/200.
Reactivity:	Human, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Synthetic peptide, corresponding to amino acids 250-300 of Human WASP.
Specificity:	This antibody detects endogenous levels of WASP protein. (region surrounding Glu284)
Formulation:	Phosphate buffered saline (PBS), pH 7.2. State: Aff - Purified State: Liquid purified Ig fraction (> 95% pure by SDS-PAGE). Preservative: 0.05% Sdium Azide
Concentration:	1.0 mg/ml
Purification:	Affinity Chromatography using epitope-specific immunogen.
Conjugation:	Unconjugated
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	~ 53 kDa
Gene Name:	Wiskott-Aldrich syndrome
Database Link:	<u>Entrez Gene 7454 Human</u> <u>P42768</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### **GRIGENE** WASP (WAS) Rabbit Polyclonal Antibody – AP06593PU-M

Background:The Wiskott-Aldrich syndrome (WAS) is a disorder that results from a monogenic defect that<br/>has been mapped to the short arm of the X chromosome at Xp11.23. WAS is characterized by<br/>thrombocytopenia, eczema, defects in cell-mediated and humoral immunity and a propensity<br/>for lymphoproliferative disease. The gene that is mutated in the syndrome encodes a 53 kDa<br/>proline-rich protein of unknown function designated WAS protein (WASP). A clue to WASP<br/>function came from the observation that T cells from affected males had an irregular cellular<br/>morphology and a disarrayed cytoskeleton suggesting the involvement of WASP in<br/>cytoskeletal organization. Close examination of the WASP sequence revealed a putative<br/>Cdc42/Rac interacting domain, homologous with those found in PAK65 and ACK. Subsequent<br/>investigation has shown WASP to be a true downstream effector of Cdc42.

Synonyms:

Wiskott-Aldrich syndrome protein, WASp
