Product datasheet for AP06696PU-M

Casein Kinase 1 alpha (CSNK1A1) Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	IF, IHC, WB
Recommended Dilution:	Western blot: 1/500-1/1000. Immunohistochemistry on paraffin sections 1/50-1/200. Immunofluorescence: 1/50-1/200.
Reactivity:	Human, Mouse, Rat
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Synthetic peptide, corresponding to amino acids 150-200 of Human Casein Kinase I $lpha$
Specificity:	This antibody detects endogenous levels of Casein Kinase Ια protein. (region surrounding Phe158)
Formulation:	Phosphate buffered saline (PBS), pH 7.2. State: Aff - Purified State: Liquid purified Ig fraction Preservative: 0.05% sodium azide
Concentration:	1.0 mg/ml
Purification:	Affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS- PAGE)
Conjugation:	Unconjugated
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Predicted Protein Size:	~ 34, 42 kDa
Gene Name:	casein kinase 1 alpha 1
Database Link:	<u>Entrez Gene 1452 Human</u> <u>P48729</u>

Casein Kinase 1 alpha (CSNK1A1) Rabbit Polyclonal Antibody – AP06696PU-M

Background:Casein kinase I (also designated CKI) and casein kinase II (also designated CKII) compose a
family of serine/threonine protein kinases which are present in all eukaryotes examined to
date. CKI family members, which include CKIα, β, γ, e and δ, have been implicated in the
control of cytoplasmic and nuclear processes, including DNA replication and repair. CKII is
usually expressed as a tetrameric complex consisting of either an α2β2 or an αα'β2 structure.
The a catalytic subunit is stimulated by the β regulatory subunit, which undergoes
autophosphorylation. CKII activity is high in the cytosol and nucleus of proliferating and
differentiating cells. CKII is known to phosphorylate more than 100 different substrates
including nuclear oncoproteins, transcription factors and enzymes involved in DNA
metabolism.

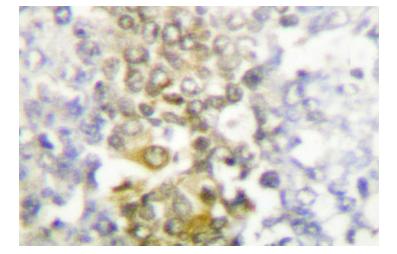

Synonyms:

Casein kinase I alpha, CKI-alpha, CK1
