

# Product datasheet for AP06737PU-N

# **MED1 Rabbit Polyclonal Antibody**

## **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	Western blot: 1/500-1/1000. Immunohistochemistry on paraffin sections: 1/50-1/200.
Reactivity:	Human, Mouse
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Synthetic peptide, corresponding to amino acids 664-720 of Human TRAP220.
Specificity:	This antibody detects endogenous levels of TRAP220 protein. (region surrounding Pro697)
Formulation:	Phosphate buffered saline (PBS), pH~7.2 State: Aff - Purified State: Liquid purified Ig fraction (> 95% pure by SDS-PAGE). Preservative: 0.05% Sodium Azide
Concentration:	1.0 mg/ml
Purification:	Affinity Chromatography using epitope-specific immunogen.
Conjugation:	Unconjugated
Storage:	Store undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: One year from despatch.
Predicted Protein Size:	~170 kDa
Gene Name:	mediator complex subunit 1
Database Link:	<u>Entrez Gene 5469 Human</u> <u>Q15648</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### **GRIGENE** MED1 Rabbit Polyclonal Antibody – AP06737PU-N

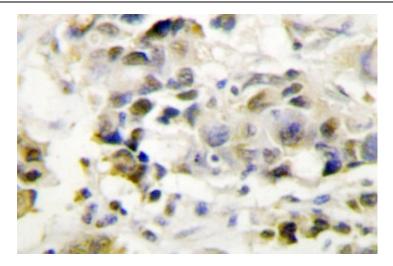

Background:In mammalian cells, transcription is regulated in part by high molecular weight coactivating<br/>complexes that mediate signaling between transcriptional activators and initiation factors.<br/>These complexes include the thyroid hormone receptor-associated protein (TRAP) complex,<br/>which interacts with thyroid receptors (TR), vitamin D receptors and other steroid receptors to<br/>facilitate hormone induced transcriptional activation. The TRAP complex consists of<br/>numerous proteins ranging in size from 20 to 240 kDa, including TRAP95, TRAP100, TRAP150,<br/>TRAP220 and TRAP230, that are characterized by the presence of a nuclear receptor<br/>recognition motif which mediates the liganddependent binding of TRAP proteins to the<br/>nuclear receptors. TRAP220 and TRAP100 are widely expressed and most abundantly<br/>detected in skeletal muscle, heart and placenta. TRAP95, TRAP150 and TRAP230 facilitate TR<br/>induced transcription by associating with an additional transcriptional coactivating complex<br/>SMCC (SRB and MED protein cofactor complex), which consists of various subunits that share<br/>homology with several components of the yeast transcriptional mediator complexes.

Synonyms:ARC205, CRSP1, CRSP200, DRIP205, DRIP230, PBP, PPARBP, PPARGBP, RB18A, TRAP220,<br/>TRIP2, Mediator complex subunit 1
