

Product datasheet for **AP08139SU-N**

Normal Rabbit Serum Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Recommended Dilution:	Blocking sera. Control sera. Serum additive in dilution buffers.
Host:	Rabbit
Clonality:	Polyclonal
Formulation:	State: Serum State: Serum (Sterile filtered) containing 0.09% Sodium Azide as a preservative.
Purification:	Processed to prevent minimal haemolysis and filtered to 0.2 µm.
Conjugation:	Unconjugated
Storage:	Store at 2-8°C for one month or in (aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Background:	Serum is the clear, straw-colored, liquid portion of blood plasma that does not contain fibrinogen or blood cells and remains fluid after clotting. Serums are obtained from non-hemolyzed blood that is collected from healthy and fasted donors. The donors are not medicated in any way and are maintained on an antibiotic free diet. Sterilization is accomplished by Millipore filtration. These serums provide excellent growth promoting components for tissue culture and microbiological organisms.
Note:	Source: Adult New Zealand Rabbits.
