

Product datasheet for **AP09026PU-N**

Fibrinogen Goat Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	ELISA, IHC, WB
Recommended Dilution:	ELISA. Immunohistochemistry on Paraffin Sections: 2.5 µg/ml. Western Blot.
Reactivity:	Human
Host:	Goat
Isotype:	IgG
Clonality:	Polyclonal
Immunogen:	Fibrinogen purified from Human plasma
Specificity:	This antibody reacts with Fibrinogen from Human plasma.
Formulation:	0.02M Potassium Phosphate, 0.15M Sodium Chloride, pH 7.2 State: Ig Fraction State: Liquid purified Ig fraction Preservative: 0.01% Sodium Azide
Concentration:	lot specific
Purification:	IgG Fractionation
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.

Background:

Fibrinogen is the main protein of blood coagulation system. It is a large protein and it consists of two identical subunits that contain three polypeptide chains: alpha, beta and gamma. All chains are connected with each other by a number of disulfide bonds. Fibrinopeptides A (1 to 16 amino acids) and B (1 to 17 amino acids) are released by thrombin from the N terminal parts of alpha and beta chains, respectively. In this way fibrinogen is converted into fibrin, which by means of polymerization forms a fibrin clot. Fibrinogen clotting underlies pathogenesis of MI, thromboembolism and thromboses of arteries and veins, since fibrin is the main substrate for thrombus formation. Fibrinogen activation is also involved in pathogenesis of inflammation, tumor growth and many other diseases. The normal fibrinogen concentration in plasma is about 3 mg/ml. The elevated level of fibrinogen in patient's blood is regarded as an independent risk factor for cardiovascular diseases. An increase in blood fibrinogen concentration was shown to be a strong predictor of coronary heart disease (Sonel A. et al, and Rapold H.J. et al). All these facts make fibrinogen an important parameter in the diagnosis of cardiovascular diseases.

Synonyms:

FGA, FGB, FGG

Fibrinogen Polyclonal Antibody-Western blot. Goat anti-Fibrinogen antibody (AP09026PU-N lot 8115) was used to detect Fibrinogen under reducing (R) and non-reducing (NR) conditions. Reduced samples of purified target proteins contained 4% BME and were boiled.

Formalin-Fixed Paraffin Embedded Human Kidney stained with Fibrinogen antibody Cat.-No AP09026PU-N at 5 g/ml after heat-induced antigen retrieval.

Formalin-Fixed Paraffin Embedded Human Liver stained with Fibrinogen antibody Cat.-No AP09026PU-N at 5 g/ml after heat-induced antigen retrieval.
