

Product datasheet for **AP09067SU-N**

Alkaline phosphatase / ALPI / IAP Goat Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	ELISA, WB
Recommended Dilution:	ELISA: 1/4,000-1/20,000 Western Blot: 1/500-1/2,000.
Reactivity:	Bovine
Host:	Goat
Clonality:	Polyclonal
Immunogen:	Alkaline Phosphatase [Calf intestine].
Specificity:	Assay by immunoelectrophoresis resulted in a single precipitin arc against purified and partially purified Alkaline Phosphatase [Calf intestine]. Cross reactivity against Alkaline Phosphatase from other tissues and species may occur but have not been specifically determined. No reaction was observed against the bacterial form of the enzyme.
Formulation:	0.01M Sodium Phosphate, 0.14M Sodium Chloride, pH 7.2 State: Serum State: Lyophilized Serum prepared from by a Delipidation and Defibrination.
Reconstitution Method:	Restore with 1.0 ml of deionized water (or equivalent).
Concentration:	lot specific
Conjugation:	Unconjugated
Storage:	Prior to reconstitution store at 2-8°C. Following reconstitution store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Database Link:	P19111

Background:

Alkaline phosphatase (ALP) removes phosphate groups from the 5' end of DNA and RNA, and from proteins, at high pH. Most mammals have 4 different isozymes: placental, placental like, intestinal and non tissue specific (found in liver, kidney and bone). Tissues with particularly high concentrations of ALP include the liver, bile ducts, placenta, and bone. Damaged or diseased tissue releases enzymes into the blood, so serum ALP measurements can be abnormal in many conditions, including bone disease and liver disease.

Synonyms:

Intestinal alkaline phosphatase
