| Product Type:          | Primary Antibodies   |
|------------------------|--|
| Applications:          | FC, IF   |
| Recommended Dilution:  | Flow Cytometry.<br>Immunofluorescence.   |
| Host:                  | Rabbit   |
| lsotype:               | lgG  |
| Clonality:             | Polyclonal   |
| Immunogen:             | KLH (Keyhole Limpet Hemocyanin)  |
| Specificity:           | This antibody reacts to Keyhole Limpet Hemocyanin (KLH).   |
| Formulation:           | 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 containing 10 mg/ml Bovine<br>Serum Albumin (BSA) and 0.01% (w/v) Sodium Azide<br>Label: FITC<br>State: Lyophilized purified Ig<br>Label: Fluorescein isothiocyanate (Molecular Weight 390 daltons)<br>Absorption emission: 495 nm / 528 nm<br>Molar radio: 3.4 moles FITC per mole of Rabbit IgG |
| Reconstitution Method: | Restore with 1,0 ml of deionized water (or equivalent).<br>For extended storage add glycerol to 50%  |
| Concentration:         | lot specific   |
| Purification:          | Affinity chromatography  |
| Conjugation:           | FITC   |
| Storage:               | Prior to reconstitution store at 2-8°C.<br>Following reconstitution store the antibody undiluted at 2-8°C for one month<br>or (in aliquots) at -20°C for longer.<br>Avoid repeated freezing and thawing.   |
| Stability:             | Shelf life: one year from despatch.  |

|             | KLH Rabbit Polyclonal Antibody – AP09215FC-N  |
|-------------|---|
| Background: | KLH (Keyhole Limpet Hemocyanin) is a copper containing oxygen carrier occurring freely<br>dissolved in the hemolymph of many molluscs and arthropods. KLH is often used in<br>molecular immunology as a carrier protein conjugated to low molecular weight molecules<br>such as peptides, amino acids, nucleic acids, drugs or toxins to render them more<br>immunogenic due to the size of the conjugate complex and the immunogenicity of KLH. KLH<br>forms a large complex composed of ~50 kDa subunits. |
| Synonyms:   | Keyhole Limpet Hemocyanine  |
