Product Type:	Primary Antibodies
Applications:	ELISA, ID, IP, WB
Recommended Dilution:	ELISA: 1/200,000. Western Blot: 1/2,000-1/10,000. Immunohistochemistry: User Optimized.
Host:	Rabbit
lsotype:	IgG
Clonality:	Polyclonal
Immunogen:	Biotin conjugated to Keyhole Limpet Hemocyanin (b-KLH)
Specificity:	This antibody reacts to Biotin.
Formulation:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 State: Aff - Purified State: Liquid Preservative: 0.01% (w/v) Sodium Azide
Concentration:	lot specific
Purification:	Affinity chromatography
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### **GRIGENE** Biotin Rabbit Polyclonal Antibody – AP09217PU-N

Background:Epitope tags are short peptide sequences that are easily recognized by tag-specific<br/>antibodies. Due to their small size, epitope tags do not affect the tagged protein's biochemical<br/>properties. Most often sequences encoding the epitope tag are included with target DNA at<br/>the time of cloning to produce fusion proteins containing the epitope tag sequence. This<br/>allows anti-epitope tag antibodies to serve as universal detection reagents for any tag<br/>containing protein produced by recombinant means. This means that anti-epitope tag<br/>antibodies are a useful alternative to generating specific antibodies to identify,<br/>immunoprecipitate or immunoaffinity purify a recombinant protein. The anti-epitope tag<br/>antibody is usually functional in a variety of antibody-dependent experimental procedures.<br/>Expression vectors producing epitope tag fusion proteins are available for a variety of host<br/>expression systems including bacteria, yeast, insect and mammalian cells. Rockland<br/>Immunochemicals produces anti-epitope tag antibodies against many common epitope tags<br/>including Myc, GST, GFP, 6X His, MBP, FLAG and HA. Rockland Immunochemicals also<br/>produces antibodies to other tags including FITC, Rhodamine (TRITC), DNP and biotin.

Synonyms:

Vitamin B7, Vitamin H
