Product Type:	Primary Antibodies
Applications:	ELISA, IHC, WB
Recommended Dilution:	ELISA. Western Blot: 1/200-1/2000. Immunohistochemistry: 1/50-1/500.
Reactivity:	Human
Host:	Rabbit
Clonality:	Polyclonal
Immunogen:	Synthetic peptide derived from an internal domain of the Human TRPM8 protein.
Specificity:	This antibody reacts with 127 kDa protein.
Formulation:	State: Serum State: Lyophilized serum Preservative: None
Reconstitution Method:	Restore in distilled water.
Conjugation:	Unconjugated
Storage:	Prior to reconstitution store the antibody at -20°C. Store reconstituted antibody at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	transient receptor potential cation channel subfamily M member 8
Database Link:	<u>Entrez Gene 79054 Human</u> <u>Q7Z2W7</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

### **GRIGENE** TRPM8 Rabbit Polyclonal Antibody – AP10556SU-N

Background:TRPM8 is a receptor-activated non-selective cation channel involved in detection of<br/>sensations such as coolness, by being activated by cold temperature below 25 degrees<br/>Celsius. Activated by icilin, eucalyptol, menthol, cold and modulation of intracellular pH.<br/>Involved in menthol sensation. Permeable for monovalent cations sodium, potassium, and<br/>cesium and divalent cation calcium. Temperature sensing is tightly linked to voltage-<br/>dependent gating. Activated upon depolarization, changes in temperature resulting in graded<br/>shifts of its voltage-dependent activation curves. The chemical agonists menthol functions as<br/>a gating modifier, shifting activation curves towards physiological membrane potentials.<br/>Temperature sensitivity arises from a tenfold difference in the activation energies associated<br/>with voltage-dependent opening and closing.

Synonyms: TRPP8, Trp-p8, LTRPC6
