

Product datasheet for AP11005PU-N

PRMT2 (N-term) Rabbit Polyclonal Antibody

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	ELISA: 1/1,000. Western blotting: 1/100-1/500. Immunohistochemistry: 1/50-1/100.
Reactivity:	Human
Host:	Rabbit
lsotype:	lg
Clonality:	Polyclonal
Immunogen:	This antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide selected from the N-terminal region of human PRMT2.
Specificity:	This antibody is specific to PRMT2 (N-term).
Formulation:	PBS containing 0.09% (W/V) Sodium Azide as preservative. State: Purified State: Liquid purified Ig fraction.
Concentration:	lot specific
Purification:	Protein G Chromatography eluted with high and low pH buffers and neutralized immediately, followed by dialysis against PBS.
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	protein arginine methyltransferase 2
Database Link:	<u>Entrez Gene 3275 Human</u> <u>P55345</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

GRIGENE PRMT2 (N-term) Rabbit Polyclonal Antibody – AP11005PU-N

Background:Arginine methylation is an irreversible post translational modification which has only recently
been linked to protein activity. At least three types of PRMT enzymes have been identified in
mammalian cells. These enzymes have been shown to have essential regulatory functions by
methylation of key proteins in several fundamental areas. These protein include nuclear
proteins, IL enhancer binding factor, nuclear factors, cell cycle proteins, signal transduction
proteins, apoptosis proteins, and viral proteins. The mammalian PRMT family currently
consists of 7 members that share two large domains of homology. Outside of these domains,
epitopes were identified and antibodies against all 7 PRMT members have been developed.

Synonyms: HMT1, HRMT1L1

Product images:

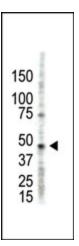

Figure 1. Western blot anti-PRMT2 Pab to detect PRMT2 in HL60 cell lysate.

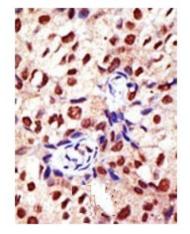

Figure 2. Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.
