

Product datasheet for AP11299PU-N

BID (BH3 Domain) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies

IHC, WB **Applications:**

Recommended Dilution: ELISA: 1/1,000.

Western blot: 1/100-1/500.

Immunohistochemistry: 1/50-1/100.

Reactivity: Human Host: Rabbit Isotype:

lg

Clonality: Polyclonal

Immunogen: This antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide

encoding the BH3 domain of human Bid.

This antibody is specific to Bid (BH3 Domain). Specificity:

Formulation: PBS containing 0.09% (W/V) Sodium Azide as preservative.

State: Purified

State: Liquid purified Ig fraction.

Concentration: lot specific

Purification: Protein G Chromatography, eluted with high and low pH buffers and neutralized

immediately, followed by dialysis against PBS.

Conjugation: Unconjugated

Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Storage:

Avoid repeated freezing and thawing.

Stability: Shelf life: one year from despatch.

Gene Name: BH3 interacting domain death agonist

Database Link: Entrez Gene 637 Human

Background: Bid is a death agonist that heterodimerizes with either agonist BAX or antagonist BCL2. Bid is

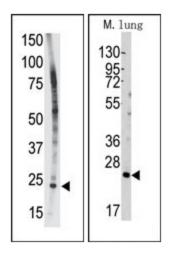

a member of the BCL-2 family of cell death regulators. It is a mediator of mitochondrial damage induced by caspase-8 (CASP8); CASP8 cleaves this encoded protein, and the COOH-

terminal part translocates to mitochondria where it triggers cytochrome c release.

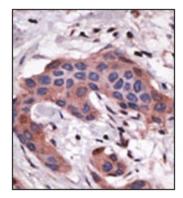

Synonyms: p22 BID

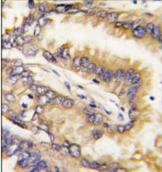

Note: Calculated MW: 21994 Da

Product images:

LEFT: The anti-Bid BH3 domain Pab is used in Western blot to detect Bid BH3 in HL-60 cell lysate. RIGHT: Western blot analysis of anti-hBid-BH3 Pab in mouse lung tissue lysates (35ug/lane). hBid-BH3 (arrow) was detected using the purified Pab.

LEFT: Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated. RIGHT: Formalin-fixed and paraffin-embedded human lung carcinoma tissue reacted with Bid BH3 Domain Antibody, which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.
