

Product datasheet for AP11486PU-N

cadherin 10 (CDH10) (C-term) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies Applications: IHC, WB **Recommended Dilution:** ELISA 1:1.000. Western blot 1:50 - 1:100. Immunohistochemistry 1:10 - 1:50. **Reactivity:** Human Host: Rabbit Isotype: lg **Clonality:** Polyclonal Immunogen: This antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide selected from the C-terminal region of human CDH10. Specificity: This antibody detects Cadherin 10 (CDH10) at C-term. Formulation: PBS with 0.09% (W/V) sodium azide State: Aff - Purified State: Liquid Ig fraction **Concentration:** lot specific **Purification:** Protein A column, followed by peptide affinity purification **Conjugation:** Unconjugated Store the antibody at 2 - 8 °C up to one month or (in aliquots) at -20 °C for longer. Avoid Storage: repeated freezing and thawing. Stability: Shelf life: one year from despatch. Gene Name: cadherin 10 Database Link: Entrez Gene 1008 Human Q9Y6N8

	cadherin 10 (CDH10) (C-term) Rabbit Polyclonal Antibody – AP11486PU-N
Background:	CDH10 is a type II classical cadherin from the cadherin superfamily, integral membrane proteins that mediate calcium-dependent cell-cell adhesion. Mature cadherin proteins are composed of a large N-terminal extracellular domain, a single membrane-spanning domain, and a small, highly conserved C-terminal cytoplasmic domain. The extracellular domain consists of 5 subdomains, each containing a cadherin motif, and appears to determine the specificity of the protein's homophilic cell adhesion activity. Type II (atypical) cadherins are defined based on their lack of a HAV cell adhesion recognition sequence specific to type I cadherins. This particular cadherin is predominantly expressed in brain and is putatively involved in synaptic adhesions, axon outgrowth and guidance.
Synonyms:	CDH10, T2-Cadherin
Note:	Molecular weight: 88321 Da

Product images:

Western blot analysis of CDH10 Antibody (C-term) in NCI-H460 cell line lysates (35 ug/lane). CDH10 (arrow) was detected using the purified Pab (1:60 dilution).

Formalin-fixed and paraffin-embedded human brain tissue reacted with CDH10 antibody (Cterm), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.
