Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	ELISA 1:1,000. Western blot 1:100 - 1:500. Immunohistochemistry 1:50 - 1:100.
Reactivity:	Human, Mouse
Host:	Rabbit
lsotype:	lg
Clonality:	Polyclonal
Immunogen:	This antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide selected from the N-terminal region of mouse TLR5.
Specificity:	This antibody detects TLR5 at N-term.
Formulation:	PBS with 0.09% (W/V) sodium azide State: Purified State: Liquid lg fraction
Concentration:	lot specific
Purification:	Protein G column, eluted with high and low pH buffers and neutralized immediately, followed by dialysis against PBS
Conjugation:	Unconjugated
Storage:	Store the antibody at 2 - 8 °C up to one month or (in aliquots) at -20 °C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	toll like receptor 5
Database Link:	<u>Entrez Gene 7100 Human</u> <u>O60602</u>

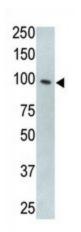

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### CRIGENE TLR5 (N-term) Rabbit Polyclonal Antibody – AP11534PU-N

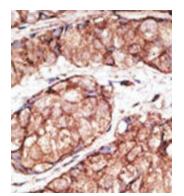

Background:TLR5, a Type I membrane protein belonging to the Toll-like receptor family, participates in the<br/>innate immune response to microbial agents. It also plays a role in mediating detection of<br/>bacterial flagellins. TLR5 acts via MyD88 and TRAF6, leading to NF-kappa-B activation, cytokine<br/>secretion and the inflammatory response. This protein binds to TIRAP and MyD88 via their<br/>respective TIR domains TLR5 is highly expressed in liver, and is detected in lung and at very<br/>low levels in most other tissues. The TLR5 gene lies in a locus that is associated with<br/>susceptibility to Salmonella. Inbred strains of mice can be classified into 3 categories<br/>according to their resistance to infection with S.typhimurium: susceptible (BALB/c, C57BL/6,<br/>C3H/He), intermediate (DBA/2, C75L) and resistant (A, CBA). The strain MOLF/Ei is highly<br/>susceptible to the infection, has an unique TLR5 haplotype and a lower expression of TRL5.

Synonyms:	Toll-like receptor 5, TIL3
Note:	Molecular weight: 97626 Da

#### **Product images:**

The anti-mTLR5 Pab is used in Western blot to detect TLR5 in HL60 cell lysate

Formalin-fixed and paraffin-embedded human breast carcinoma reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by AEC staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.
