Product datasheet for AP12026PU-N

USP12 (C-term) Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	ELISA: 1/1,000. Western Blot: 1/100-1/500.
Reactivity:	Human
Host:	Rabbit
lsotype:	lg
Clonality:	Polyclonal
Immunogen:	This antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide selected from the C-terminal region of human USP12.
Specificity:	This antibody is specific to USP12 (C-term). Predicted to cross react with Mouse (100% Antigen Homology).
Formulation:	PBS with 0.09% (W/V) Sodium Azide as preservative. State: Purified State: Liquid purified Ig fraction.
Concentration:	lot specific
Purification:	Protein G Chromatography, eluted with high and low pH buffers and neutralized immediately, followed by dialysis against PBS.
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	ubiquitin specific peptidase 12
Database Link:	Entrez Gene 219333 Human O75317

Serigene USP12 (C-term) Rabbit Polyclonal Antibody – AP12026PU-N

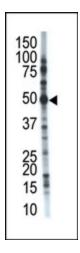

Background:Modification of target proteins by ubiquitin participates in a wide array of biological
functions. Proteins destined for degradation or processing via the 26 S proteasome are
coupled to multiple copies of ubiquitin. However, attachment of ubiquitin or ubiquitin-related
molecules may also result in changes in subcellular distribution or modification of protein
activity. An additional level of ubiquitin regulation, deubiquitination, is catalyzed by proteases
called deubiquitinating enzymes, which fall into four distinct families. Ubiquitin C-terminal
hydrolases, ubiquitin-specific processing proteases (USPs),1 OTU-domain ubiquitin-aldehyde-
binding proteins, and Jab1/Pad1/MPN-domain-containing metallo-enzymes. Among these
four families, USPs represent the most widespread and represented deubiquitinating
enzymes across evolution. USPs tend to release ubiquitin from a conjugated protein. They
display similar catalytic domains containing conserved Cys and His boxes but divergent N-
terminal and occasionally C-terminal extensions, which are thought to function in substrate
recognition, subcellular localization, and protein-protein interactions.

Synonyms:

Note:

Ubiquitin carboxyl-terminal hydrolase 12, UBH1, USP12L1 **Predicted Molecular weight:** 41201 Da
