	LLGL2 (N-term) Rabbit Polyclonal Antibody – AP12122PU-N
Background:	The lethal (2) giant larvae protein of Drosophila plays a role in asymmetric cell division, epithelial cell polarity, and cell migration. LLGL2 is a protein similar to lethal (2) giant larvae of Drosophila. In fly, the protein's ability to localize cell fate determinants is regulated by the atypical protein kinase C (aPKC). In human, this protein interacts with aPKC-containing complexes and is cortically localized in mitotic cells.
Synonyms:	HGL, Lethal(2) giant larvae protein homolog 2
Note:	Predicted Molecular weight: 113448 Da
