

Product datasheet for **AP12713PU-N**

SRC pTyr215 Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	WB
Recommended Dilution:	ELISA: 1/1,000. Western Blot: 1/100-1/500.
Reactivity:	Human
Host:	Rabbit
Isotype:	Ig
Clonality:	Polyclonal
Immunogen:	This antibody is generated from rabbits immunized with a KLH conjugated synthetic phosphopeptide corresponding to amino acid residues surrounding Y215 of human Src.
Specificity:	This antibody detects Src pTyr215. Predicted to cross react with Mouse (100% Antigen Homology).
Formulation:	PBS with 0.09% (W/V) Sodium Azide as preservative. State: Aff - Purified State: Liquid purified Ig fraction.
Concentration:	lot specific
Purification:	Protein G Affinity Chromatography. Then, the antibody fraction is peptide affinity purified in a 2-step procedure with control and phosphorylated peptides. The phospho-specific antibody is eluted with high and low pH buffers and neutralized immediately, followed by dialysis against PBS.
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	SRC proto-oncogene, non-receptor tyrosine kinase
Database Link:	Entrez Gene 6714 Human P12931

Background:

This gene is highly similar to the v-src gene of Rous sarcoma virus. This proto-oncogene may play a role in the regulation of embryonic development and cell growth. The protein encoded by this gene is a tyrosine-protein kinase whose activity can be inhibited by phosphorylation by c-SRC kinase. Mutations in this gene could be involved in the malignant progression of colon cancer. Two transcript variants encoding the same protein have been found for this gene. Transcript Variant: This variant (1) represents the longer transcript. Both isoforms 1 and 2 encode the same protein.

Synonyms:

c-Src, pp60c-src

Note:

Molecular weight: 59704 Da

FG Pancreatic Carcinoma Cell Lines stably expressing vector along (FG-V) the $\beta 3$ integrin subunit (FG- $\beta 3$) or a $\beta 3$ truncation mutant (FG-759x). Phospho-Src-Y215 Antibody was diluted 1:500 in 1% BSA/TBST and incubated Overnight at 4°C. After washing 3x 5 min. with TBST the blots were incubated with 1:5000 Goat anti-mouse or Goat anti-rabbit secondary antibody for 1 hr at Room temperature. The blots were again washed 3x 5 min. with TBST and developed using ECL reagent. Data and protocol kindly provided by Dr. Weis of Cheresch Lab, UCSD
