Integrin Linked Kinase (ILK) pThr173 Rabbit Polyclonal Antibody - AP12903PU-N

Background: Transduction of extracellular matrix signals through integrins influences intracellular and

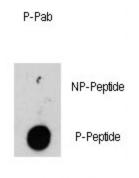

extracellular functions, and appears to require interaction of integrin cytoplasmic domains with cellular proteins. Integrin-linked kinase (ILK), interacts with the cytoplasmic domain of beta-1 integrin. ILK is a serine/threonine protein kinase with 4 ankyrin-like repeats, which associates with the cytoplasmic domain of beta integrins and acts as a proximal receptor

kinase regulating integrin-mediated signal transduction.

Synonyms: ILK-1, ILK-2, p59ILK, ILK, ILK1, ILK2

Note: Molecular weight: 51288 Da
