

## Product datasheet for **AP13204PU-N**

### OASL (C-term) Rabbit Polyclonal Antibody

#### Product data:

Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	ELISA: 1/1,000. Western blotting: 1/100 - 1/500. Immunohistochemistry: 1/50 - 1/100.
Reactivity:	Human
Host:	Rabbit
Isotype:	Ig
Clonality:	Polyclonal
Immunogen:	This antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide selected from the C-terminal region of human OASL.
Specificity:	This antibody reacts to OASL.
Formulation:	PBS with 0.09% (W/V) sodium azide State: Purified State: Liquid purified Ig
Concentration:	lot specific
Purification:	Protein G column, eluted with high and low pH buffers and neutralized immediately, followed by dialysis against PBS
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	2'-5'-oligoadenylate synthetase like
Database Link:	<a href="#">Entrez Gene 8638 Human Q15646</a>

**Background:**

2-prime,5-prime oligoadenylates (2-5As) bind to and activate RNase L, leading to degradation of RNA and inhibition of protein synthesis. 2-5As are produced by 2-5A synthetases (OASs), a highly-conserved family of interferon-induced enzymes. The predicted 514-amino acid human p59OASL (2-5A synthetases-like) protein shares a highly conserved N-terminal domain with other OASs. The C-terminal portion of p59OASL contains 2 ubiquitin-like domains. p59OASL is expressed in most tissues, with the highest levels in hematopoietic tissues, colon, and stomach.

**Synonyms:**

p59 OASL, TR-interacting protein 14

**Product images:**

The anti-OASL C-term Antibody is used in Western blot to detect OASL in HL60 lysate.

Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by AEC staining.
