

Product datasheet for AP13558PU-N

PKC theta (PRKCQ) (C-term) Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	ELISA: 1/1,000. Western blotting: 1/100 - 1/500. Immunohistochemistry: 1/50 - 1/100.
Reactivity:	Human
Host:	Rabbit
lsotype:	lg
Clonality:	Polyclonal
Immunogen:	This antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide selected from the C-terminal region of human PKC.
Specificity:	This antibody reacts to PKC theta.
Formulation:	PBS with 0.09% (W/V) sodium azide State: Purified State: Liquid purified Ig
Concentration:	lot specific
Purification:	Protein G column, eluted with high and low pH buffers and neutralized immediately, followed by dialysis against PBS
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	protein kinase C theta
Database Link:	<u>Entrez Gene 5588 Human</u> <u>Q04759</u>

PKC theta (PRKCQ) (C-term) Rabbit Polyclonal Antibody - AP13558PU-NBackground:Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be
activated by calcium and the second messenger diacylglycerol. PKC family members
phosphorylate a wide variety of protein targets and are known to be involved in diverse
cellular signaling pathways. PKC family members also serve as major receptors for phorbol
esters, a class of tumor promoters. Each member of the PKC family has a specific expression
profile and is believed to play a distinct role. PKC theta is one of the PKC family members. It is
a calcium-independent and phospholipid-dependent protein kinase. This kinase is important
for T-cell activation. It is required for the activation of the transcription factors NF-kappaB
and AP-1, and may link the T cell receptor (TCR) signaling complex to the activation of the
transcription factors.

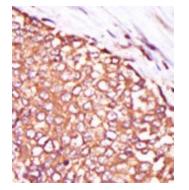

Synonyms:

PKC theta, PKC-theta, nPKC-theta, Protein kinase C theta type

Western blot analysis of anti-PKC theta Pab in placenta lysate. PKC theta (Arrow) was detected using purified Pab. Secondary HRP-anti-rabbit was used for signal visualization with chemiluminescence.

Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by DAB staining.
