Western blot analysis of anti-URKL1 Pab in 293 cell line lysate (35 ug/lane). URKL1 (arrow) was detected using the purified Pab (1:50 dilution).

Formalin-fixed and paraffin-embedded human cancer tissue (hepatocarcinoma) reacted with the primary antibody, which was peroxidaseconjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.
