

# Product datasheet for AP14130PU-N

## SAPK3 (MAPK12) (C-term) Rabbit Polyclonal Antibody

### **Product data:**

#### **Product Type: Primary Antibodies** IHC, WB **Applications:** Recommended Dilution: ELISA: 1/1,000. Western blotting: 1/100 - 1/500. Immunohistochemistry: 1/10 - 1/50. **Reactivity:** Human, Mouse Host: Rabbit Isotype: lg **Clonality:** Polyclonal Immunogen: This antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide selected from the C-terminal region of human P38 gamma. Specificity: This antibody reacts to p38 gamma (MAPK12). Formulation: PBS with 0.09% (W/V) sodium azide State: Purified State: Liquid purified lg **Concentration:** lot specific **Purification:** Protein G column, eluted with high and low pH buffers and neutralized immediately, followed by dialysis against PBS **Conjugation:** Unconjugated Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Storage: Avoid repeated freezing and thawing. Stability: Shelf life: one year from despatch. Gene Name: mitogen-activated protein kinase 12 Database Link: Entrez Gene 6300 Human <u>P53778</u>

	SAPK3 (MAPK12) (C-term) Rabbit Polyclonal Antibody – AP14130PU-N
Background:	P38 gamma is a member of the MAP kinase family. MAP kinases act as an integration point for multiple biochemical signals, and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcription regulation and development. Activation of members of the mitogen-activated protein kinase family is a major mechanism for transduction of extracellular signals. Stress-activated protein kinases are one subclass of MAP kinases. P38 gamma functions as a signal transducer during differentiation of myoblasts to myotubes.
Synonyms:	Mitogen-activated protein kinase 12, ERK5, Stress-activated protein kinase 3, p38 gamma, ERK6, SAPK3, MAP kinase p38 gamma

### **Product images:**

Western blot analysis of anti-P38gamma C-term Pab in mouse muscle tissue lysate. P38gamma (arrow) was detected using purified Pab. Secondary HRP-anti-rabbit was used for signal visualization with chemiluminescence.

Formalin-fixed and paraffin-embedded human skeletal muscle tissue reacted with the P38 gamma antibody (C-term), which was peroxidaseconjugated to the secondary antibody, followed by DAB staining.
