

# Product datasheet for AP14330PU-N

# ErbB 4 (ERBB4) (C-term) Rabbit Polyclonal Antibody

## **Product data:**

#### OriGene Technologies, Inc.

| Product Type:         | Primary Antibodies  |
|-----------------------|---|
| Applications:         | IHC, WB   |
| Recommended Dilution: | ELISA: 1/1,000.<br>Western blotting: 1/100 - 1/500.<br>Immunohistochemistry: 1/50 - 1/100.  |
| Reactivity:           | Human   |
| Host:                 | Rabbit  |
| lsotype:              | lg  |
| Clonality:            | Polyclonal  |
| Immunogen:            | This antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide selected from the C-terminal region of human ErbB4. |
| Specificity:          | This antibody reacts to ErbB4.  |
| Formulation:          | PBS with 0.09% (W/V) sodium azide<br>State: Purified<br>State: Liquid purified Ig   |
| Concentration:        | lot specific  |
| Purification:         | Protein G column, eluted with high and low pH buffers and neutralized immediately, followed by dialysis against PBS                           |
| Conjugation:          | Unconjugated  |
| Storage:              | Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer.<br>Avoid repeated freezing and thawing.             |
| Stability:            | Shelf life: one year from despatch.   |
| Gene Name:            | erb-b2 receptor tyrosine kinase 4   |
| Database Link:        | <u>Entrez Gene 2066 Human</u><br><u>Q15303</u>  |

# Image: Critical ContentErbB 4 (ERBB4) (C-term) Rabbit Polyclonal Antibody - AP14330PU-NBackground:Protein kinases are enzymes that transfer a phosphate group from a phosphate donor,<br/>generally the g phosphate of ATP, onto an acceptor amino acid in a substrate protein. By this<br/>basic mechanism, protein kinases mediate most of the signal transduction in eukaryotic cells,<br/>regulating cellular metabolism, transcription, cell cycle progression, cytoskeletal<br/>rearrangement and cell movement, apoptosis, and differentiation. With more than 500 gene<br/>products, the protein kinase family is one of the largest families of proteins in eukaryotes.<br/>The family has been classified in 8 major groups based on sequence comparison of their<br/>tyrosine (PTK) or serine/threonine (STK) kinase catalytic domains.

#### Synonyms: p180erbB4, c-ErbB-4, HER-4

## **Product images:**

Western blot analysis of anti-ErbB4 Pab in T-47D cell lysate. ErbB4 (arrow) was detected using purified Pab. Secondary HRP-anti-rabbit was used for signal visualization with chemiluminescence.

Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by DAB staining.
