

Product datasheet for **AP14369PU-N**

Integrin Linked Kinase (ILK) Rabbit Polyclonal Antibody

Product data:

Product Type:	Primary Antibodies
Applications:	IHC
Recommended Dilution:	ELISA: 1/1,000. Immunohistochemistry: 1/10 - 1/50.
Reactivity:	Human
Host:	Rabbit
Isotype:	Ig
Clonality:	Polyclonal
Immunogen:	KLH conjugated synthetic peptide corresponding to amino acid residues surrounding Y343 of human ILK.
Specificity:	This antibody reacts to ILK.
Formulation:	PBS with 0.09% (W/V) sodium azide State: Aff - Purified State: Liquid purified Ig
Concentration:	lot specific
Purification:	Affinity chromatography on Protein A
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	integrin linked kinase
Database Link:	Entrez Gene 3611 Human Q13418

Background:

Transduction of extracellular matrix signals through integrins influences intracellular and extracellular functions, and appears to require interaction of integrin cytoplasmic domains with cellular proteins. Integrin-linked kinase (ILK), interacts with the cytoplasmic domain of beta-1 integrin. ILK is a serine/threonine protein kinase with 4 ankyrin-like repeats, which associates with the cytoplasmic domain of beta integrins and acts as a proximal receptor kinase regulating integrin-mediated signal transduction.

Synonyms:

ILK-1, ILK-2, p59ILK, ILK, ILK1, ILK2

Product images:

Formalin-fixed and paraffin-embedded human skeletal muscle tissue reacted with Phospho ILK Antibody (S343), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining.
