Product Type:	Primary Antibodies
Applications:	IHC, WB
Recommended Dilution:	
Reactivity:	Human, Mouse
Host:	Rabbit
lsotype:	lg
Clonality:	Polyclonal
Immunogen:	This antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide selected from the N-terminal region of human MATK.
Specificity:	This antibody recognizes MATK.
Formulation:	PBS with 0.09% (W/V) Sodium Azide as preservative. State: Purified State: Liquid purified lg fraction.
Concentration:	lot specific
Purification:	Protein G Chromatography, eluted with high and low pH buffers and neutralized immediately, followed by dialysis against PBS
Conjugation:	Unconjugated
Storage:	Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing.
Stability:	Shelf life: one year from despatch.
Gene Name:	megakaryocyte-associated tyrosine kinase
Database Link:	<u>Entrez Gene 4145 Human</u> <u>P42679</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

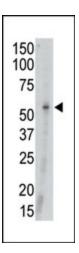

### **GRIGENE** MATK (N-term) Rabbit Polyclonal Antibody – AP14472PU-N

Background:MATK has amino acid sequence similarity to Csk tyrosine kinase and has the structural<br/>features of the CSK subfamily: SRC homology SH2 and SH3 domains, a catalytic domain, a<br/>unique N terminus, lack of myristylation signals, lack of a negative regulatory<br/>phosphorylation site, and lack of an autophosphorylation site. This protein is thought to play<br/>a significant role in the signal transduction of hematopoietic cells. It is able to phosphorylate<br/>and inactivate Src family kinases, and may play an inhibitory role in the control of T-cell<br/>proliferation. This protein might be involved in signaling in some cases of breast cancer.

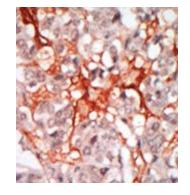

#### Synonyms:

Megakaryocyte-associated tyrosine-protein kinase, CHK, CTK, HYL, HYLTK

### **Product images:**

Western blot analysis of anti-MATK Pab in mouse thymus tissue lysate. MATK (arrow) was detected using purified Pab. Secondary HRP-anti-rabbit was used for signal visualization with chemiluminescence.

Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by DAB staining.
