

Product datasheet for AP14583PU-N

alpha Actinin 4 (ACTN4) (N-term) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies IHC, WB **Applications:** Recommended Dilution: ELISA: 1/1,000. Western blotting: 1/50 - 1/100. Immunohistochemistry: 1/10 - 1/50. **Reactivity:** Human Host: Rabbit Isotype: lg **Clonality:** Polyclonal Immunogen: This antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide selected from the N-terminal region of human ACTN4. Specificity: This antibody reacts to ACTN4. Formulation: PBS with 0.09% (W/V) sodium azide State: Purified State: Liquid purified lg **Concentration:** lot specific **Purification:** Prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS **Conjugation:** Unconjugated Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Storage: Avoid repeated freezing and thawing. Stability: Shelf life: one year from despatch. Gene Name: actinin alpha 4 Database Link: Entrez Gene 81 Human 043707

Image: Second state Alpha Actinin 4 (ACTN4) (N-term) Rabbit Polyclonal Antibody – AP14583PU-N Background: Alpha actinins belong to the spectrin gene superfamily which represents a diverse group of cytoskeletal proteins, including the alpha and beta spectrins and dystrophins. Alpha actinin is an actin-binding protein with multiple roles in different cell types. In nonmuscle cells, the

an actin-binding protein with multiple roles in different cell types. In nonmuscle cells, the cytoskeletal isoform is found along microfilament bundles and adherens-type junctions, where it is involved in binding actin to the membrane. In contrast, skeletal, cardiac, and smooth muscle isoforms are localized to the Z-disc and analogous dense bodies, where they help anchor the myofibrillar actin filaments. This protein is a nonmuscle, alpha actinin isoform which is concentrated in the cytoplasm, and is thought to be involved in metastatic processes. Mutations in the gene encoding this protein have been associated with focal and segmental glomerulosclerosis.

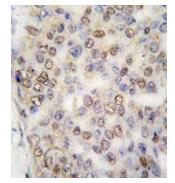

Synonyms:

Non-muscle alpha actinin 4

Product images:

Western blot analysis of anti-ACTN4 Antibody (Nterm) in Hela cell line lysates (35ug/lane). ACTN4 (arrow) was detected using the purified Pab.

Immunohistochemistry on breast carcinoma
