

Product datasheet for AP15100PU-N

Adenylate kinase 5 (AK5) (N-term) Rabbit Polyclonal Antibody

Product data:

Product Type: Primary Antibodies IHC, WB **Applications:** Recommended Dilution: ELISA: 1/1,000. Western blotting: 1/100 - 1/500. Immunohistochemistry: 1/50 - 1/100. **Reactivity:** Human, Mouse Host: Rabbit Isotype: lg **Clonality:** Polyclonal Immunogen: This antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide selected from the N-terminal region of human AK5. Specificity: This antibody reacts to AK5. Formulation: PBS with 0.09% (W/V) sodium azide State: Purified State: Liquid purified lg **Concentration:** lot specific **Purification:** Protein G column, eluted with high and low pH buffers and neutralized immediately, followed by dialysis against PBS **Conjugation:** Unconjugated Storage: Store the antibody undiluted at 2-8°C for one month or (in aliquots) at -20°C for longer. Avoid repeated freezing and thawing. Stability: Shelf life: one year from despatch. Gene Name: adenylate kinase 5 Database Link: Entrez Gene 26289 Human <u>Q9Y6K8</u>

CRIGENE Adenylate kinase 5 (AK5) (N-term) Rabbit Polyclonal Antibody – AP15100PU-N

Background:Protein kinases are enzymes that transfer a phosphate group from a phosphate donor,
generally the g phosphate of ATP, onto an acceptor amino acid in a substrate protein. By this
basic mechanism, protein kinases mediate most of the signal transduction in eukaryotic cells,
regulating cellular metabolism, transcription, cell cycle progression, cytoskeletal
rearrangement and cell movement, apoptosis, and differentiation. With more than 500 gene
products, the protein kinase family is one of the largest families of proteins in eukaryotes.
The family has been classified in 8 major groups based on sequence comparison of their
tyrosine (PTK) or serine/threonine (STK) kinase catalytic domains. The AGC kinase group
consists of 63 kinases including the cyclic nucleotide-regulated protein kinase (PKA & PKG)
family, the diacylglycerol-activated/phospholipid-dependent protein kinase C (PKC) family, the
related to PKA and PKC (RAC/Akt) protein kinase family, the kinases that phosphorylate G
protein-coupled receptors family (ARK), and the kinases that phosphorylate ribosomal protein
S6 family (RSK).

Synonyms:

AK6; MGC33326

Product images:

The anti-AK5 Pab is used in Western blot to detect AK5 in mouse liver tissue lysate.

(LEFT)Formalin-fixed and paraffin-embedded human cancer tissue reacted with the primary antibody, which was peroxidase-conjugated to the secondary antibody, followed by AEC staining. (RIGHT)Formalin-fixed and paraffinembedded human brain tissue reacted with AK5 Antibody (N-term), which was peroxidaseconjugated to the secondary antibody, followed by DAB staining
